

## MultiReg Saniterm

Digital temperature controller and monitor with 3 alarms

- Measurement of temperature with NiCr-Ni sensor
- 3 programmable alarm levels
- Individually adjustable alarm hysteresis
- Individually selectable upper or lower alarms
- Standard 96\*96 DIN housing

### Description

MultiReg Saniterm is a controller/monitor with a four digit LCD display and 3 alarms with LED indicator. The alarms can be set by the 6 keys at the front panel. Each alarm has individually settable hysteresis. Each alarm can act as either upper or lower alarm.

### Technical data

Supply:	240V, 220V, 110V or 24V ac $\pm 10\%$ (specify on ordering)
Sensor:	Type K NiCr-Ni DIN IEC 584
Range:	0...1200°C
Display:	4 digit LCD display of value and 8 LED's indicating alarm and relay status
Connection:	Removable 12 pole plug
Output:	3 relays max load 5A/220V
Housing:	96x96x110mm panel mounting according to DIN 43700
Environment:	0...50°C noncondensing
Weight:	approx. 0,5 Kg
